 i) alyssa titus    j) lyssa    k) false  
 l) true

5. a) true    b) false    c) true    d) false  
 e) true    f) true

8. a) When the method contains return:

```
public static dataType methodName (para) {
    }

```

When method does not return:

```
public static void methodName (para) {
    }

```

b) When a method contains return you can:

- 1) store values    2) print values

When a method does not return any values:

You can call the method to simply handle actions
